PROJECTS

MedFind — Mother & Child Pharmacy System | Angular 18, Node.js, Express.js, MySQL, IndexedDB Nov 2025 - Mar 2026

- Worked as the Front-End Developer and Primary Debugger, responsible for designing, developing, testing, and troubleshooting the system interface.
- Developed key modules including the medicine finder, inventory management, POS system, and pre-order functionality for pharmacy operations.
- Implemented IndexedDB-based offline synchronization to support uninterrupted system usage and automatic data syncing when internet access became available.

Owens Bakery Shop Website | WordPress, SEO, Google Analytics, Google Search Console Jan 2025 - Apr 2025

- Developed and maintained the website, handling page creation, content updates, responsive design, and overall site functionality.
- Implemented SEO improvements and monitored website performance using Google Analytics and Google Search Console, contributing to increased organic traffic and search visibility.
- Optimized user experience and website performance through continuous testing, maintenance, and usability improvements.

EDUCATION

BS Information Technology, Major in Web Development 2022 - Present
Holy Angel University (HAU), Angeles City, Pampanga
